PROFESSIONAL SUMMARY

AI and data engineering fresher with a PG-Diploma in Big Data Analytics from C-DAC and 6 months of industry experience. Built production-oriented RAG pipelines, Medallion Architecture data systems, and GCP-based analytics workflows. Hands-on with LangChain, ChromaDB, HuggingFace embeddings, PySpark, dbt, and BigQuery. Targeting Junior AI Engineer and AI/ML roles in production-focused environments.

EDUCATION

C-DAC Advanced Computing Training School (ACTS)

Bengaluru, India

Post Graduate Diploma in Big Data Analytics (PG-DBDA)

Feb 2025

– Core Modules: Machine Learning, Python Programming, Big Data Technologies, Data Collection & DBMS

JD College of Engineering and Management

Nagpur, India

Bachelor of Technology in Electronics & Telecommunication | GPA: 6.45/10.0

Aug 2021 – May 2024

EXPERIENCE

Data Analyst Intern

Jun 2025 – Dec 2025

Global Web Package

Nagpur, India

- Eliminated data inconsistencies across 10,000+ business records by applying SQL validation rules and Excel-based audit checks, improving reporting accuracy to 100% alignment with quality standards
- Translated raw operational data into structured weekly and monthly reports using Excel dashboards and pivot tables, accelerating stakeholder decision-making for non-technical audiences
- Collaborated with 3+ functional teams over a 6-month engagement to resolve cross-team data mismatches and standardize reporting workflows

TECHNICAL PROJECTS

Local-RAG: Regulatory Compliance Query Pipeline | LangChain, ChromaDB, Ollama (Llama3), HuggingFace, Streamlit

- Built a fully offline RAG pipeline to ingest, chunk, embed, and query unstructured regulatory PDF documents with zero dependency on paid cloud APIs, achieving sub-2-second query response on local hardware
- Implemented context-preserving document chunking using LangChain's RecursiveCharacterTextSplitter to prevent fragmentation across complex multi-section compliance texts
- Designed a persistent local vector store using ChromaDB with open-source HuggingFace sentence embeddings, enabling low-latency semantic search across indexed document collections
- Integrated Ollama-hosted Llama3 with structured prompt templates to enforce source-grounded responses and eliminate hallucinations in compliance-critical queries

End-to-End Medallion Architecture Pipeline | PySpark, dbt, Delta Lake, Databricks, SQL

2026

- Engineered a fault-tolerant data ingestion system using Spark Structured Streaming with checkpointing across Bronze, Silver, and Gold layers, enforcing schema validation at each stage
- Built a Gold-layer star schema using dbt with Jinja-templated transformations and modular Python models, enabling automated dimensional modeling and downstream BI reporting

GA4 E-Commerce Analytics Dashboard | BigQuery, Looker Studio, GCP, SQL

2026

- Ingested GA4 event data into BigQuery and wrote 15+ SQL queries to analyze funnel drop-off, product performance, and user behavior patterns across e-commerce categories
- Designed an interactive Looker Studio dashboard tracking 8 core KPIs including conversion rate, session duration, and revenue, accessible to non-technical business stakeholders

Weekly KPI Performance Dashboard | MS Excel, Power BI, Power Query, DAX, RFM Segmentation

2026

- Automated 3 recurring weekly reports using Power Query and dynamic pivot tables, tracking sales, retention, and RFM segmentation across 5 business dimensions on a 9,994-row dataset
- Built Power BI visuals with DAX measures for real-time KPI monitoring, reducing manual reporting effort and enabling on-demand performance tracking

TECHNICAL SKILLS

Languages & Query: Python (Pandas, NumPy, PySpark), SQL (PostgreSQL, BigQuery)

GenAI & RAG: LangChain, LlamaIndex, Ollama, ChromaDB, HuggingFace Transformers, Prompt Engineering

Big Data & Cloud: Apache Spark, Databricks, dbt, Delta Lake, Google Cloud Platform (GCP), BigQuery

Visualization & Reporting: Power BI (DAX), MS Excel (Power Pivot, Power Query), Looker Studio

Concepts: RAG Pipelines, Medallion Architecture, Semantic Search, ETL/ELT, Dimensional Modeling, RFM Segmentation

Developer Tools: Git, Docker, VS Code, Jupyter Notebook

CERTIFICATIONS

Data Analyst – Big 4 Ready | OneRoadmap | CERT-63CC2915 | March 2026

Data Analyst Internship Completion Certificate | Global Web Package, Nagpur | December 2025
